

Recycling/End of Life

Timberland has a long heritage of bootmaking. We also have a longstanding commitment to environmental stewardship. Sometimes the two compete.

Bootmaking uses energy, chemicals, and resources—all of which can have a negative impact on the environment. To live up to our environmental values, we continue to push ourselves to create more sustainable products.

To that end, we source environmentally-preferred materials and we design durable products that withstand the test of time.

Ultimately, our goal at Timberland is to drive innovation that makes high quality, low-impact, and long-lasting products commonplace.
